ACCIO
CONSULT & CONSTRUCT

Construction

Accio Consult & Construct have built a reputation for excellence on construction projects across industry sectors. Collectively, we have vast experience working as a main contractor for some of the UK's biggest names. Whatever the size and scope of your project, we have a proven formula to deliver on time and on budget.

Accio are one of the leading construction companies in the UK with significant expertise in both traditional builds and modern methods of construction (MMC). Our robust processes and integrated approach to project delivery mean we remain ahead of our competitors. Because our capabilities cover the entire project lifecycle, you can expect the same exceptional service from start to finish.

Though clients choose us for our expertise, it's our passion, integrity, and commitment to delivering value that keeps them coming back. We believe in the power of collaboration, and every team member has a unique part to play in bringing a project to life. We work closely with you to understand your needs and to create buildings that are bespoke to you, down to the finest detail. This is why we continue to enjoy long-term contracts and partnering arrangements with the majority of our clients.

Delivering excellent results for clients is our biggest priority, but we also take our responsibility to the environment on which we build very seriously. We utilize intelligent offsite techniques to make our builds environmentally and economically efficient as possible, helping to reduce waste and emissions whilst also saving time and money. This is backed up by our ISO 14001 and our Gold Standard Ecovadis qualifications.

Retail Construction

Our comprehensive retail solutions include store builds and extensions, demountable structures and short and long term storage

Office Refurbishment & development

High specification, future proofed offices where business can flourish

Built environment structures

Using intelligent off-site techniques to create bespoke modular buildings that grow with you

ACCIO
CONSULT & CONSTRUCT

Temporary Demountable Buildings

Our fast and flexible demountable structures help businesses to maintain and expand trade and adapt to emerging demands. We've supported some of the UK's biggest clients, building seasonal storage for major retailers, creating fully-fledged office environments, and even providing emergency structures for crisis response. In fact, 95% of the UK's Temporary Supermarkets since 2007 have an Accio badge on them. That's Tesco, Sainsbury's, Lidl, Morrisons and Waitrose covered.

Accio's inventory is second to none, offering everything from entry-level, short term, and value-led structures to long-term, regulation compliant buildings. Whether you require a building for a week or a decade, our team will work closely with you to create a demountable solution that meets your requirements. Demountable buildings offer you pace and precision. Because they can be anchored to hard or soft surfaces, there's often no need for costly and time-hungry foundations. But don't be fooled into thinking that temporary means unstable or low-quality! Our demountable buildings are designed to BS 6399 for wind and snow loading, and finished to the highest standard.

Whether you require a building for a week or a decade, our team will work closely with you to create a demountable solution that meets your requirements.

Temporary warehouse structures

Additional structures without the hassle or expense.

Temporary canopies

Additional structures without the hassle or expense.
